

K-love has been a great value to me and my family. As a security officer for a hospital it helps give me the encouragement for the evening and relaxes me after my work. Regarding my family it has given them the desire to grow and learn more on the life and acts of Christ. I couldn't ask for another thing. The music is soothing and we don't get bombarded with the many commercial jargins as we would on other station. This station has reached out to so many that if it was replaced I fear for those just coming to know the good messages that K-Love sends out. Many are searching some have found but if taken away quickly they may start to search again. To loose such a good thing would be devistating, not only personally but to a community as well. K-Love offers the priveledge to worship our Lord and to gain perspective into everyday activities through their moments of discussion and thought. They offer news that is of importance in a uplifting manner. I would very much hate to see this station off the air. It has been my life line and has been what I listen to when I wake and when I go to sleep. It has been such a comfort to myself and my family especially after this previous year with the amount of loss that we have all suffered.

Sincerely

Melissa Brock
